Create sub-space

A sub-space for the current space will be created.
Content in Confluence is organized into spaces.
A space is where your pages live, where your blog is posted, and where your mail is and can view or contribute to the content of a space.
There is no limit to how many spaces you can create.
Enter the name of the sub-space

Enter the key of the sub-space

Help Tip

Use the dialog to define the hierarchical space structure by changing the parent of a current existing space.

Static links are shown in the space structure too, and can be used to define links to external systems. (1) adds a new link to define a new static link, (2) deletes a static link.
