

Other Products

@ Subscriptions

The users can create infinite quantity of subscription on every filter they want. Furthermore the subscription can be sent frequently and include the group of people who can not unsubscribe. It may cause problems with overload of system and the administrators may never know about presence of such big quantity of subscriptions. Now your administrator can see all the subscriptions and delete them.

There are no comments yet on this issue.

A man in a black long-sleeved shirt is sitting at a desk, looking down at a document he is holding. On the desk in front of him are two silver laptops. To his left, there are two potted plants in wicker baskets. The background is a wall with a blue and white patterned projection. The overall lighting is dim, suggesting an indoor office or meeting environment.

Want your own add-on?

Need your own customization for JIRA or Confluence - our team is always here to help.

We can develop integration, processing and other plugins which meets your requirements.
