Confluence,

The screenshot shows a Teams meeting window with a presentation slide titled "How We Define Team Communication" and a comment box from Harvey Jennings.

Presentation Slide:

- Top navigation: Overview, Products, Select, Select Strategy
- Section: COLLABORATION FAMILY MARKET
- Section: How We Define Team Communication
- Diagram: A tree diagram showing "Before Team Comm." with "Person" at the top, branching into "Email" and "Team". "Email" further branches into "Person", "Team", and "Software". A yellow speech bubble icon is placed over the "Email" node. Below the diagram, text reads: "Team comms replaces many of the action oriented emails a person would have sent and makes email more of a one way comms channel. It also allows you to have bi-directional comms with your software and team. It completely replaces your need for consumer IM and replaces much of your need for email."
- Bottom navigation: INTRO
- Footer: Show all files

Comment Box:

- Author: Harvey Jennings
- Text: Ryan Lee - These lines are covering the word 'email'. Needs to be cleaned up.
Also this diagram isn't exactly what we outlined on [Product Strategy: Team Communication in Space](#)
Can you replicate what we came up with there?
- Buttons: Save, Cancel

Drop a pin anywhere on a file
to leave targeted feedback

The screenshot shows a Confluence page titled "Board of Directors Briefing - Jan 20, 2015". The page content includes a bulleted list with the following items:

- [@Ryan Lee](#)
- [@Harvey Jennings](#)
- [@Alana Grant](#)
- The TIS Board of Directors

Below the list is a "Discussion Items" table:

Time	Item	Who
10min	Intros	
35min	Briefing	
15min	Q&A	

An "Add inline comment" dialog is open over the list. The dialog shows a comment from [@Alana Grant](#) asking: "Are the forecasts ready to go into the presentation?". Below the comment, it says "Resolve • Like • just now". At the bottom of the dialog are "Save" and "Cancel" buttons.

Give feedback in the context of the page - highlight just one word or a whole paragraph.

How We Define Team Communication

Before Team Comm.

```
graph TD
    Person1[Person] --> Email1[Email]
    Person1 --> ConsumerM[Consumer M]
    Email1 --> Person2[Person]
    Email1 --> Team1[Team]
    Email1 --> Software1[Software]
    ConsumerM --> Person3[Person]
```

After Team Comm.

```
graph TD
    Person4[Person] --> Email2[Email]
    Email2 --> Team2[Team]
```

Team comm replaces many of the action oriented emails a person would have sent and makes email more of a one way comm. to have bi-directional comm with your software and team. It completely replaces you need for consumer M and replaces that with a team.

Ryan Lee

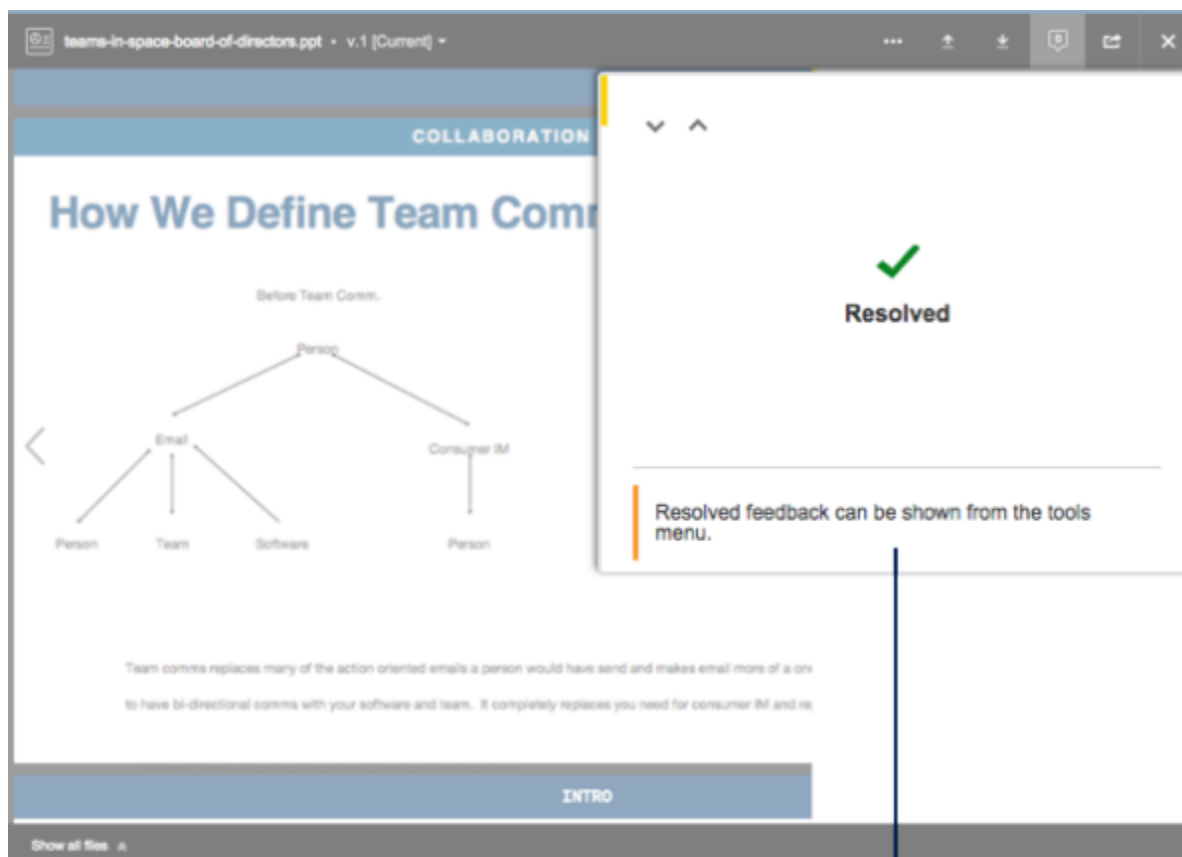

@Harvey Jennings - Oh good idea. I'll fix this slide up this afternoon 😊
