Use this page to add a new Submission repository

Use this page to add a new Submission repository

Display Name:

Subversion Repository Details

Repository Root:
Full paths to the Subversion root of the repository are supported. Help: [http://svn-1 and file:// are supported. Note: when using the protocol, there must be 3 slash characters after "http://", for example, "http://path/to/repo".](#)

Revision Indexing: ☒ Index and link to any non-linked revision keys in the revision history ☐ Do not index and link to the Revision History

Revision Cache Size:
The number of revisions to keep cached in memory for quick retrieval. Note: this number does not affect the speed at which revisions are loaded up from the index (so get revisions for a given revision). This affects the speed at which the list of revisions of those revisions are retrieved from SVN.

Username:

Password:

Private key file:

Please note: this association for the private key file is permanent across.

Web Linking

Web Link:
☒ WebLink for SVN Use WebLink for SVN for the web link. You may select from any of the three possible options provided. Note: the web link should be based on the root of your repository. You will need to customize these templates accordingly.

View Format:
