Confluence,

The screenshot shows a Teams meeting window with a presentation slide titled "How We Define Team Communication" and a comment box from Harvey Jennings.

The presentation slide is titled "How We Define Team Communication" and features a diagram. The diagram shows a central circle with a yellow speech bubble icon. To the left, a tree structure shows "Person" branching into "Email", "Team", and "Software". To the right, a tree structure shows "Person" branching into "Software", "Person", and "Team". The slide also includes text: "Before Team Comm.", "Team comm replaces many of the action oriented emails a person would have sent and makes email more of a one way comm channel. It also allows you to have bi-directional comm with your software and team. It completely replaces your need for consumer IM and replaces much of your need for email.", and "INTRO".

The comment box, from Harvey Jennings, contains the following text:

Ryan Lee - These lines are covering the word 'email'. Needs to be cleaned up.

Also this diagram isn't exactly what we outlined on [Product Strategy: Team Communication in Space](#)

Can you replicate what we came up with there?

The screenshot shows a Confluence page titled "Board of Directors Briefing" created by Ryan Anderson. The page includes a date of Jan 20, 2015, a list of attendees (Ryan Lee, Harvey Jennings, Alana Grant, and The TIS Board of Directors), and a "Discussion Items" table. A circular callout labeled "Add inline comment" points to a comment icon on a bulleted list. The list items are: "category", "es numbe", "Forecasts for FY201", and "Answer questions f". A modal window on the right shows a comment from Ryan Lee asking Alana Grant if forecasts are ready for a presentation. Alana Grant's reply is visible, mentioning a link to "Teams in Space FY2015 Financial Forecasts". The modal has "Save" and "Cancel" buttons.

Time	Item	Who
10min	Intros	
35min	Briefing	
15min	Q&A	

Give feedback in the context of the page - highlight just one word or a whole paragraph.

How We Define Team Communication

Before Team Comm.

```
graph TD
    Person1[Person] --> Email1[Email]
    Person1 --> ConsumerM[Consumer M]
    Email1 --> Person2[Person]
    Email1 --> Team1[Team]
    Email1 --> Software1[Software]
    ConsumerM --> Person3[Person]
```

After Team Comm.

```
graph TD
    Person4[Person] --> Email2[Email]
    Email2 --> Team2[Team]
```

Team comm replaces many of the action oriented emails a person would have sent and makes email more of a one way comm. to have bi-directional comm with your software and team. It completely replaces you need for consumer M and replaces the need for a consumer M.

Ryan Lee

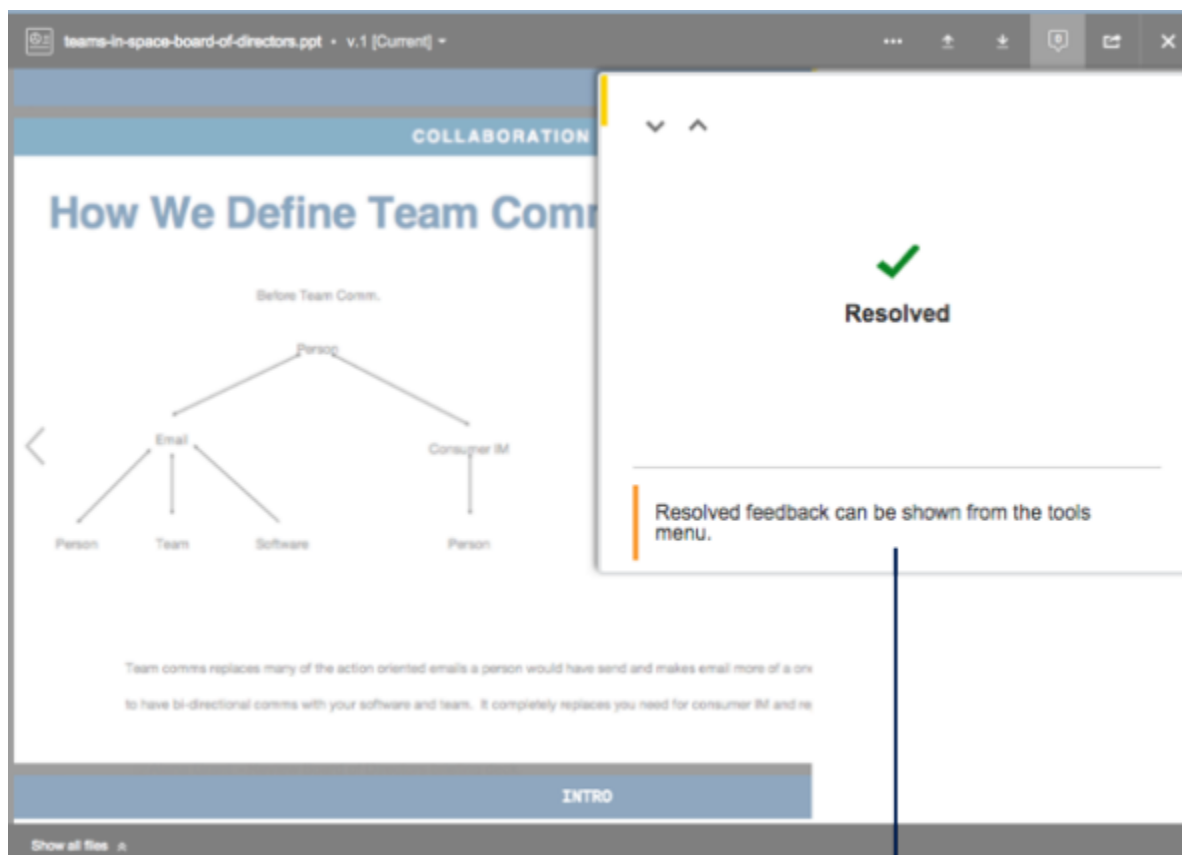

@Harvey Jennings - Oh good idea. I'll fix this slide up this afternoon 😊
