Edit Space Details

Change the space name and upload a Space logo

Configure Sidebar

Space admins can configure the space sidebar to add and re-order space shortcut links

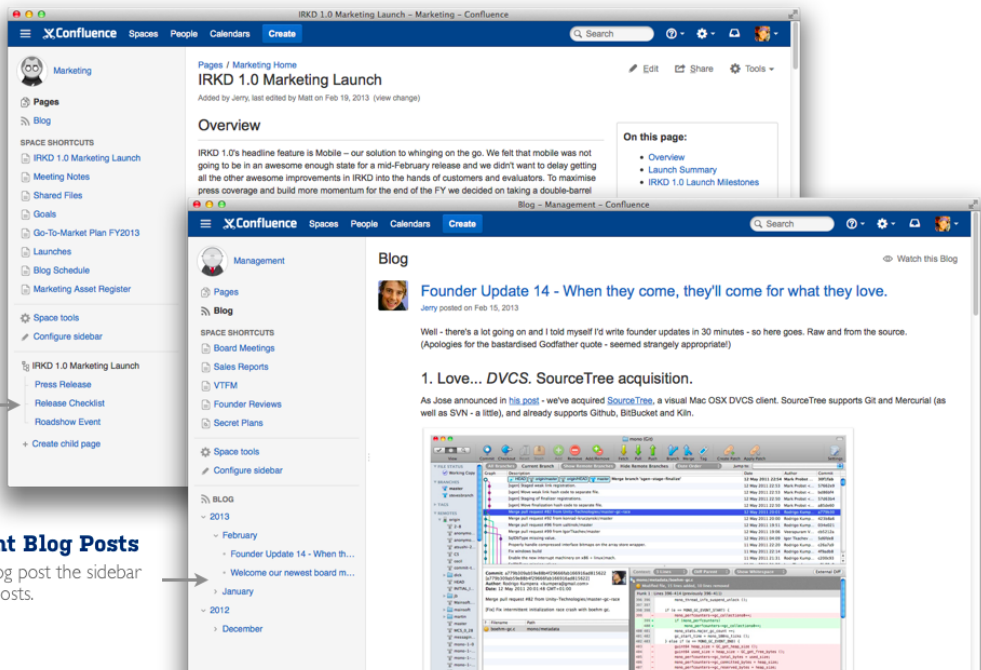

Navigate Child Pages

The sidebar provides quick access to the children of the current page.

Browse Recent Blog Posts

When viewing a blog post the sidebar will display recent posts.

The screenshot shows the Confluence interface for a page titled "Development Home". The top navigation bar includes "Spaces", "People", "Calendars", and a "Create" button. A search bar is located on the right. The left sidebar contains a tree view with the following items: "Development Home", "Brainstorming and Ideas", "IRKD Releases", "IRKD Roadmap", "Meeting Notes", and "Requirements". A green circle highlights this sidebar menu, and a green callout box points to it with the text: "Focus on your content by collapsing the sidebar. Everything you need is still a click away." The main content area shows a "Recently Updated" section with entries by "Jerry" and "Ryan". Below this is a calendar view for February and March, and a grid of team members including Tim, Jessie, Samantha, Sarah, and Jens.
